

Hello,

I am restoring a vintage sewing machine and I am looking for a specific replacement part.

Here are the details of my machine:

- **Make & Model:** [e.g., Singer Featherweight 221]
- **Serial Number:** [e.g., AJ123456]
- **Part Needed:** [e.g., Bobbin Case / Tension Spring]
- **Dimensions/Markings:** [e.g., 20mm diameter, stamped with #45751]

I have attached photos of the broken part and the machine's serial number plate for reference.

Could you please confirm if this item is compatible with my specific model? If not, do you have a suitable alternative in stock?

Thank you, [Your Name]
